

Combined PADI Rebreather and Advance Rebreather Course

ABOUT THE REBREATHER COURSE

You will learn about scrubbers, oxygen consumption and bailout requirements including how to configure a bailout cylinder system and much more.

EQUIPMENT

We provide the Hollis PRISM2 rebreather with front mounted counterlungs configuration, for rent unless you already have purchased one of your own. **Beyond your own mask, fins and exposure suit (either wet suit or dry suit suitable for the environment), reel and a collapsible snorkel, if you have one, you need for the entire course, an offboard bailout system (bailout).** If you don't have a bailout of your own,

your instructor will provide you with one fitted with a bailout cylinder system with open-circuit regulator and SPG (included in the costs). You also need a Delayed Surface Marker Buoy (DSMB) and reel/spool.

INTRODUCTION

The combined PADI Rebreather Diver and Advanced Rebreather Diver course is designed so it can be conducted for qualified students as **a single integrated program. The course introduces you to rebreather diving to a maximum depth 30 meters or if you already are a PADI Deep Diver, down to 40 metre.**

PROGRAM PREREQUISITE

PADI Open Water Diver, PADI Rebreather Diver, have a minimum of 30 logged dives and be at least 18 years old.

PRICE

1050 Euro excluding if you bring your own Hollis PRISM2 rebreather or 1150 Euro including the use of a Hollis PRISM2 rebreather we provide.

CERTIFICATION

After a completed course and, successfully completed the course exam, scoring 80 percent or higher, followed by review of any items missed until achieving mastery, you will be certified as a PADI Rebreather Diver and PADI Advance Rebreather Diver i.e. **2 certifications, on a Hollis PRISM2 rebreather, and you will receive 2 e-certificates to prove it.**

PROGRAM DURATION

6-7 days covering 1 confined water dives and 7 open water dives (8 dives total).
